Where Do We Go From Here? Patient-facing science is a patient's right. We must always include patients to ensure they have ample opportunity to connect with the science. Making informed decisions about their care depends on it! Reconnecting this way might also guide and improve patient clinical trial participation, trust in healthcare, and communication amongst providers. EVENTUALLY, I hope to BrainStorm Cancer yearly in AZ & I hope it STORMS in every state! **NETWORKING WILL BE THE KEY TO BUILDING SMALLER RESEARCH AND PATIENT ADVOCACY CONSORTIUMS. WHAT WILL BE YOUR CONTRIBUTION?**

Honoring ALL of the patients, families, physicians, and innovators in the battle against #BrainCancer. LIVING is larger than Life! #LetsBeTheSTORM
